SUMMARY

Web Developer with extensive full-stack experience in building and enhancing web applications. Demonstrated expertise in Frontend and Backend development through projects such as building a banking website with advanced user and operational features, and developing comprehensive authentication systems with streamlined user management. Aiming to leverage my skills in React, TypeScript, and Node.js to contribute effectively to robust web development projects.

Skills

- HTML, CSS, JavaScript, ReactJS, Node.js, Express.js, MongoDB, Flutter, Supa-base, Docker, Data structure & Algorithm.

Work Experience

Zenollect Pvt. Ltd.

Jun 2024 - Present

SDE-2

- Developed a comprehensive banking website using Supa-base for both frontend and backend, leveraging JavaScript to improve user experience and operational efficiency.
- Implemented authentication features such as sign-in, sign-up, password recovery, and tenant onboarding via Excel uploads, enhancing user access management.
- Streamlined client onboarding by facilitating processes for multiple tenants, sub-tenants, and signatories, and efficiently managing bank details and licenses.
- Designed and developed modules for agencies and agents, specifically for collection, recovery, and tele-calling, leading to improved operational workflows.
- Established role-based access control with multiple user roles and permissions, improving security and access control. Utilized Git for version management to ensure code integrity and collaboration.

Virya Logistics Technologies Pvt. Ltd.

Jun 2023 - Feb 2024

Full Stack Developer

- Developed multi-platform web applications and implemented a user management system for various UAM roles, including Cross-Border, Central, and Domestic Transport, to enhance user role management efficiency.
- Built an entity management system that works for both Indian and non-India for vendors and customers, incorporating fields such as GST, PIN, and TIN etc., while verifying entity status to control access to branches and users, improving data organization and access control.
- Designed and implemented vehicle and driver management systems to track and manage fleet operations and driver assignments, resulting in improved tracking and operational efficiency in transportation and delivery logistics.
- Implemented role-based access control across on entity, vehicle and driver management, allowing specific users to view or edit data based on assigned permissions, enhancing security and operational control.

Tech ferry Infotech Pvt. Ltd.

Mar 2022 - Jun 2023

Software Developer

- Designed the website architecture, including database schema, backend APIs, and frontend components, enhancing system scalability and performance.
- Created a broker registration page and implemented Brokers Email functionality with plan management, allowing brokers to update details, upgrade pricing plans, and manage house-related features.
- Implemented Brokers Email functionality, enabling email communication and updates in both the front end and back end, and developed a feature to manage plan upgrades, pricing, and house-related features.
- Built a subscription management system, allowing customers to access premium features based on their payment status.

News Xsys Technologies.

Sep 2020 - Mar 2022

Software Developer

- Enhanced responsive design using CSS, improving user experience across various devices.
- Created new tabs for the Navbar, Dashboard, Slider, and Home, enhancing navigation and user interaction.
- Implemented REST full APIs and integrated frontend and backend components, improving data flow and overall application performance.
- Ensured UI/UX designs adhered to usability guidelines, resolved bugs, and enhanced user satisfaction and accessibility.

Education

Bachelor of Technology (MDU ROHTAK)

July 2014 - Sep 2018
