## SUMMARY

Web Developer with extensive full-stack experience in building and enhancing web applications. Demonstrated expertise in Frontend and Backend development through projects such as:- Building a banking website with enhanced user and operational capabilities and developing comprehensive authentication systems and streamlined user management modules. Aims to leverage this comprehensive skill set to contribute effectively to web development projects focusing on robust React and TypeScript and Node.js development.

## Skills

- HTML, CSS, JavaScript, ReactJS, Node.js, Express.js, MongoDB, Flutter, Supa-base, Docker, Data structure & Algorithm, Java, Spring-boot, microservices

## Work Experience

### Zenollect Pvt. Ltd.

Jun 2024 - Present

#### SDE-2

- Built a banking website using Supa-base for both frontend and backend, utilizing JavaScript to enhance user experience and operational efficiency.
- Developed authentication features including Sign-in, sign-up, Forgot Password, and Tenant Onboarding using Excel uploads, improving user access management.
- Facilitated multiple tenant onboarding processes, including sub-tenants and signatories, and managed bank details and licenses, streamlining client setup.
- Developed agency and agent modules for collection, recovery, and tele-calling, improving operational workflows.
- Created multiple user roles and permissions, enhancing security and access control with Git for version management.

### Virya Logistics Technologies Pvt. Ltd.

Jun 2023 - Feb 2024

#### Full Stack Developer

- Built multi-platform web applications and developed a user management system for different UAM roles, including Cross-Border, Central, and Domestic Transport, using Express.js and Supa-base, leveraging JavaScript for improved user role management efficiency.
- Developed an entity management page for vendors and customers, displaying different fields such as GST, PIN, and TIN, and verified entity status to control access to branches and users, enhancing data organization and access control.
- Developed vehicle and driver management System to track and manage the fleet and driver assignments, using CSS and HTML, which improved operational efficiency in transportation and delivery operations. Implemented Git for source control and versioning.

### Tech-ferry Infotech Pvt. Ltd.

Mar 2022 - Jun 2023

#### Software Developer

- Designed the architecture of the website, including database schema, backend APIs, and frontend components, improving system efficiency and scalability
- Developed Brokers Email functionality and updated email features in frontend and backend, enhancing user communication and plan management
- Developed Subscription feature and Payment Page using Node.js and MongoDB, enabling premium features for paid customers and improving user engagement

### News-Xsys Technologies.

Sep 2020 - Mar 2022

#### Software Developer

- Enhanced responsive design using CSS, improving user experience across devices
- Created new tabs for Navbar, Dashboard, Slider, and Home, enhancing navigation and user interaction
- Resolved bugs and added new features for both frontend and backend using Express.js and MongoDB, enhancing application functionality
- Implemented RESTful APIs and integrated frontend and backend components, improving data flow and application performance
- Ensured UI/UX designs met usability guidelines, enhancing user satisfaction and accessibility

## Education

### MDU ROHTAK

July 2014 - Sep 2018

Bachelor of Technology
